

FERTINET®

CLOSE THE GAPS TO STOP RANSOMWARE

IT'S A GOOD TIME TO BE A CYBER CRIMINAL.

BUSINESSES PAID

\$850 in ransoms
alone in 2016

It's getting **easier** and **less expensive** to carry out attacks.

New technology trends are **creating more gaps to exploit.**

SO MANY ATTACK VECTORS. SO LITTLE TIME.

EMAIL

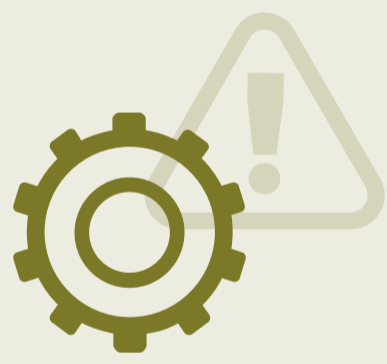

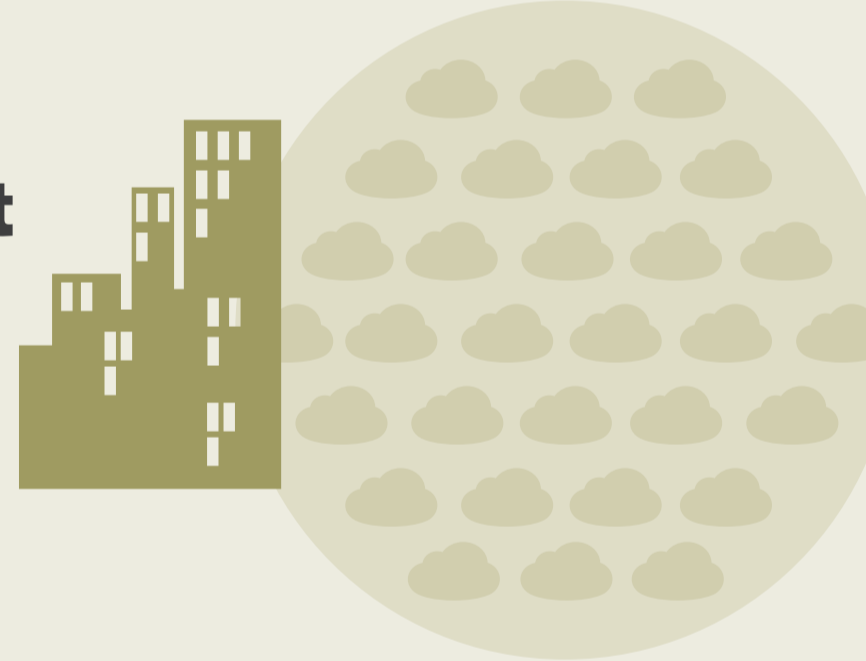

97% of phishing emails
deliver ransomware.

Two-thirds of installed malware in 2016 entered via email.*

SaaS

The average enterprise uses about **30 DIFFERENT CLOUD SERVICES.**

Two-thirds of all network traffic is encrypted, making it harder to see threats.

WEB APPLICATIONS

Web application attacks are the **TOP SOURCE** of data breaches.*

Unprotected web apps are easily compromised.

ENDPOINT DEVICES

Ransomware infects **30-50K** devices per month.

The sheer number of connected devices is overwhelming.

IF YOU BUILD A SECURITY FABRIC,
THEY WILL LOSE.

Cover ALL attack vectors through coordinated **Advanced Threat Protection (ATP).**

Ensure inspection of traffic, objects, and user activity throughout the entire network.

Automate and share intelligence between security components to close the gaps and enable a fast response to threats.
